

# Proposed Monitoring and Reporting Framework for EREP, EEEP and National Action Plans

Hyacinth Elayo  
ECREEE, Praia, Cabo Verde

# BACKGROUND (1)

- The time frame of the **EEEE** targets is 2020; the EEEP document does not specify how the implementation of the EEEP will be monitored.
- The time frame of the **EREP** targets is 2020 and 2030; chapter 4.13 of the policy specifies that ECREEE will develop a **monitoring and reporting system**. The document also mentions that there will be a **need to revise/update the policy** in the future but does not specify when this will take place.
- The time frame for the **SE4ALL** targets (and the Sustainable Development Goals) is 2030.

## BACKGROUND (2)

- The ECREEE *Implementation Framework for the Development and Execution of NREAPs and NEEAPs* includes **recommendations for monitoring and reporting by MS and ECREEE.**
- We (ECREEE & MS) have an obligation to report to the ECOWAS Authorities on progress made/not made in the attainment of regional targets;
- **A proposal for the monitoring of the implementation of the EREP, the EEEP and SE4All will be presented to the next Meeting of the ECOWAS Ministers of Energy**

# PROPOSED MONITORING AND REPORTING FRAMEWORK (1)

- The main responsibility for monitoring the implementation of and updating the NREAPs, NEEAPs and SE4All Action Agendas lies with the member states.
- The main responsibility for monitoring the implementation of the EREP and the EEEP lies with ECREEE. Information on the status of implementation of the national plans is necessary.
- ECREEE is also responsible for updating the regional policies.

# PROPOSED MONITORING AND REPORTING FRAMEWORK (2)

- ECREEE plans to:
  - Monitor the implementation of the regional policies (esp. the achievement of the targets) based on data and information provided by the Member States; and
  - Facilitate the periodical revision and updating of the regional policies.

# PROPOSED MONITORING AND REPORTING FRAMEWORK (3)

ECREEE is aware of significant **data gaps** concerning some of the agreed indicators (e.g. stand-alone off-grid systems, disaggregated data, etc);

Assist Member States to close these data gaps through **regional exchange and technical assistance**

Seek Synergies with ECOWREX

# PROPOSED NATIONAL AND REGIONAL REPORTS

- Member States will compile a **brief annual report** about progress towards the achievement of the targets contained in the three action plans, which will be submitted to ECREEE in July of each year.
- ECREEE will analyze the national reports and compile an annual **synthesis report** (draft: September) that will be presented to the annual meeting of the Ministers of Energy and subsequently published.

# REVISION AND UPDATING OF POLICIES AND ACTION PLANS

- The NREAPs, NEEAPs and AAs (especially the targets) will be revised and **updated every five years** (i.e. June 2020, June 2025).
- The EREP and EEEP (especially the targets) will also be revised and **updated every five years**. This should be a bottom-up process, i.e. the regional targets would be based on the new targets of the updated NREAPs and NEEAPs.
- The revision of the regional policies can start once the updated action plans are available, i.e. in the 2<sup>nd</sup> half of 2020 and 2025.
