- **Availability of Information**
 - There were cases with old or not available information even for electricity generating capacity, so data had to be found in different sources
- **Missing information**
 - Imports –exports, leading to distortions and double counting
- **Not well defined cooking information**
 - So a lot of research was necessary at different sources to assess situation, and also
 - Aggregation or disaggregation

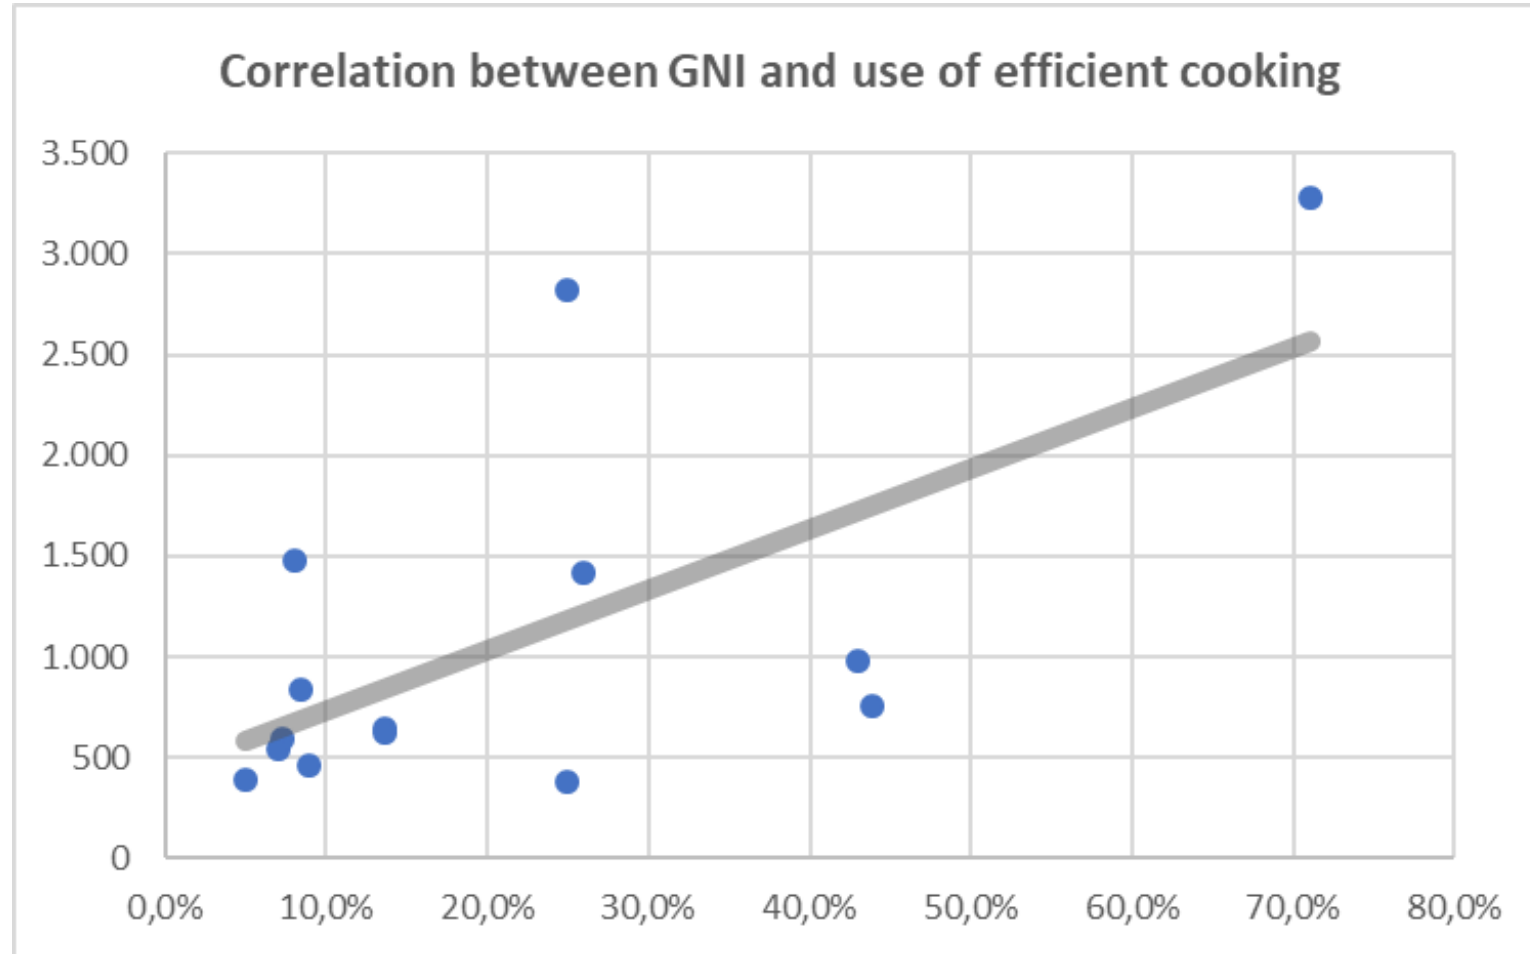

A Cooking

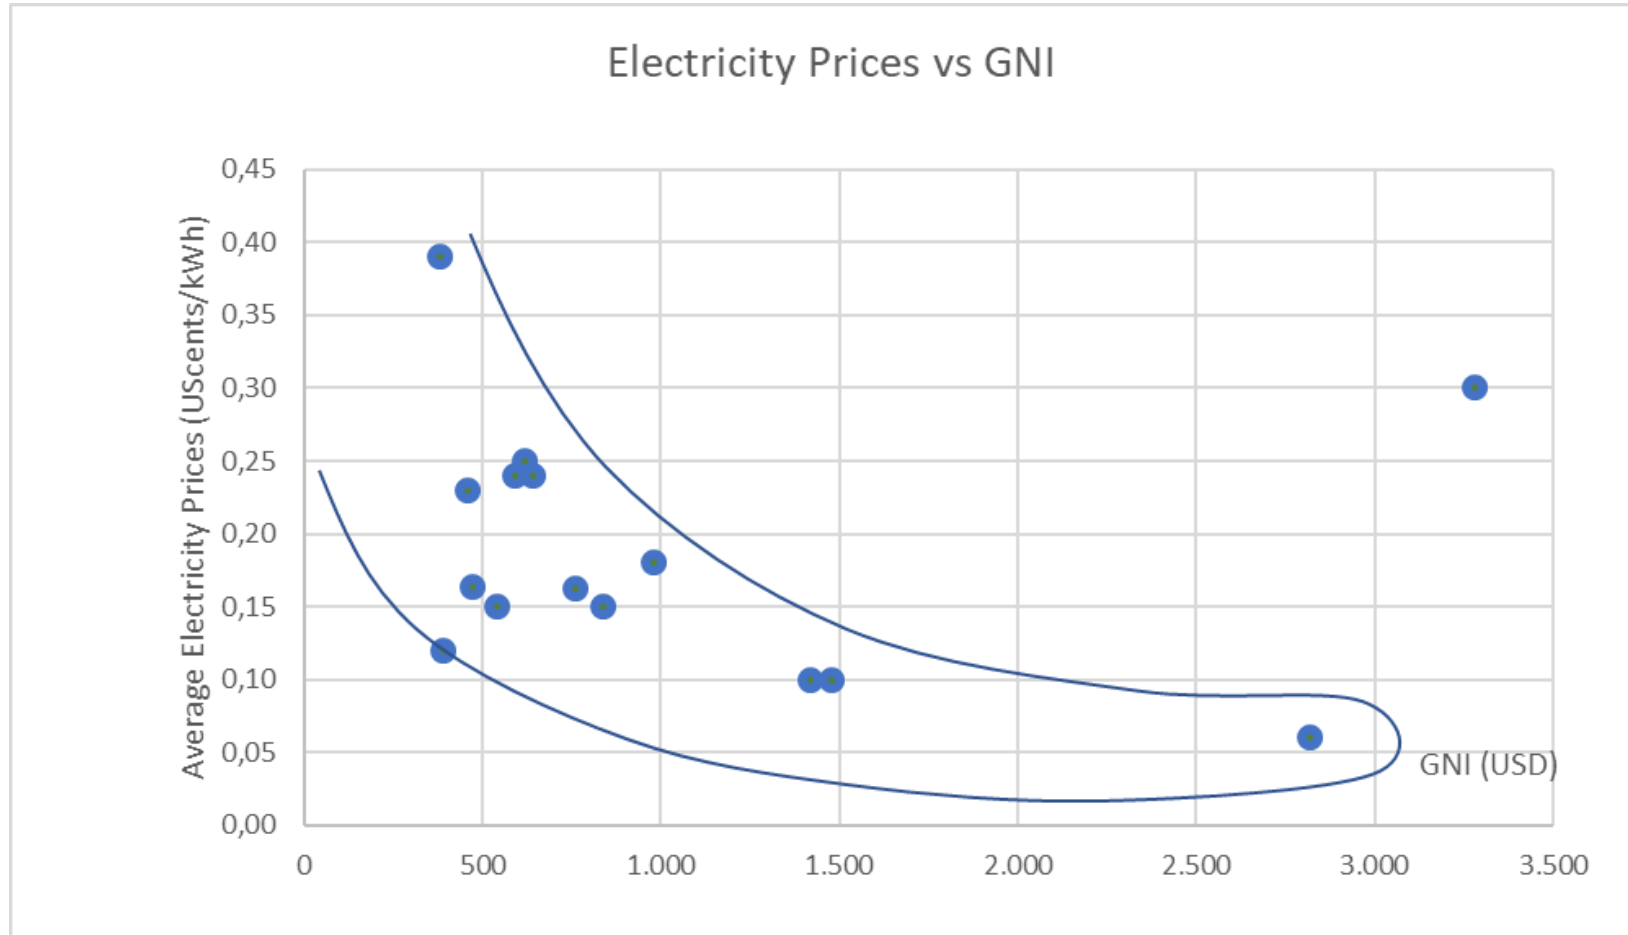

E Installed vs Operational Capacity

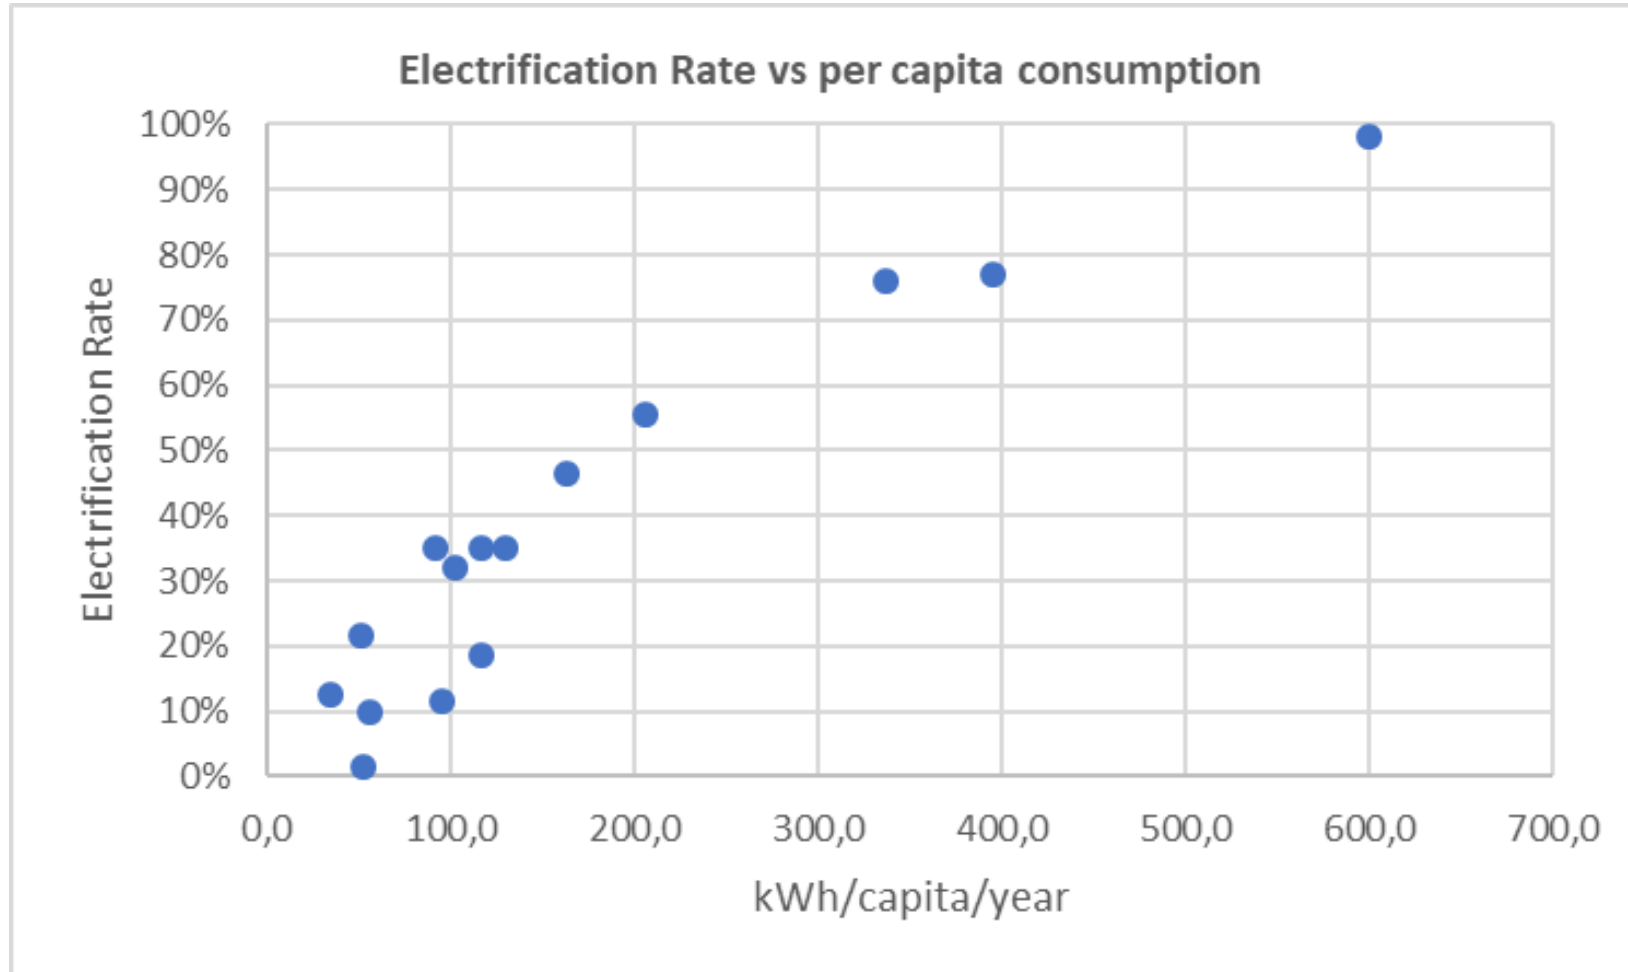

B Efficient Cooking vs GNI

C Efficient Cooking vs GNI

D Efficient Cooking vs GNI

The goal is to turn data into information, and information into insight

- « You can have data without information, but you cannot have information without data. » [Daniel Keys Moran](#), an American computer programmer and science fiction writer.
- « It is a capital mistake to theorize before one has data. » [Sherlock Holmes](#)
- « The price of light is less than the cost of darkness. » [Arthur C. Nielsen](#), Market Researcher & Founder of ACNielsen
